

Alexis: Gas

Maya: liquid

Jessica: air/ nature stroll

Emmy: coastal stroll/ solid

E: Hi, im coastal stroll and I will be telling this lovely story about how I can be a solid, liquid, and gas.

M: Hi, I'm liquid coastal stroll and when I get put over a hot surface, I melt.

A: I'm gaseous coastal stroll when liquid coastal stroll evaporates.

J: I'm air. The gaseous coastal stroll is moving all around me and bumping into me. Rude!

E: In my Package I start out as a solid.

M: But when the temperature rises or a flame is put on the solid candle, the candle *melts* into a liquid. ( shows it ) and goes up into the air as a gas. When the temperature rises you can smell us more and I evaporate.

A: then the scent of coastal stroll goes up into the air as a gas. ( show it ) When the solid turns into a gas, it sublimates!

J: It moves around w me and it molecules spread out. ( show it )

M: And the liquid will freeze to solid.

E: But when the temp drops

A: The gas will condense to a liquid

J: and it will desublimates!

E: when the temp drops you can smell us less!

M: Now, let's welcome our guest star: Nature stroll!

J: Hi, im nature stroll and I have three states of matter too!

A, M, E: Hi nature stroll!

E: will you tell us how *you* become three different states of matter?!

J: ( monologue )
